b/ Inventories of the Presses for 1933-34

File No. PRS. 19 of 1934 | General and Revenue Secretariat

From the Comptr to GOI
No. Ad. 513 d. 17-4-1935.
Fwg copy of letter from the Supt. Govt. Printg explaining the cause for the difference of Rs 63-1-9 referred to in the Memo of Observations.

Points for orders as noticed by the Comptr in the Memo:—

Para 1 of the Memo.

Point 1.

The Comptr states that the Supt Govt Printg Branches directed to append the figures relating to ~~the~~ Column 9 — "additions during the year" in the form of an abstract at the end of the Inventory if opening of Sub-Columns is likely to create confusion.

There seems to be no difficulty in accepting this proposal of the Comptr. If approved the Supt Govt Printg Branches consulted.

This is necessary if the details required by the Comptroller are absolutely necessary for audit. dt 28/5

Para 3 of the Memo.

Point 2

Opening a depreciation account at the Branch Presses

The Supt states that this will be done from the next year if so ordered.

The Branches directed to do so if approved.

This is necessary as there is an order on file in the Central Press. This will be settled according. dt 28/5

4164 V 5150

(4)

Inventories of Office Presses for 1933-34

General and Revenue Secretariat. | File No. Pres 19 of 1934 | [App. F. III-2

Para 4 of the Memo.

Point 3.

Comptr's suggestion fixing different values of depreciation on obsolete materials and machinery.

The Supdt states that this is not possible and supports his view with ref to G.O. No. 11/2/32 P.W.S. dt 30-1-33.

The Comptr requests orders on this suggestion of his Govt for orders.

This is not necessary to have different values of depn for obsolete machines & material as they are sold by auction under orders of Govt each time. Such miscellaneous items is not perhaps of any great benefit.

28/5

Para 5 of the Memo

Point 4.

Comptr's suggestion Rounding off the cost of depreciation to the nearest rupee.

Supdt states that this is a good suggestion & will be followed if approved.

The suggestion of the Comptroller appears to be a useful one & Govt agree to the proposal. There is not much scope herein for this

28/5

Points 2 & 4 may be sanctioned as the Supdt has agreed to the Comptr's suggestions.

Points 1 & 3 are submitted for consideration

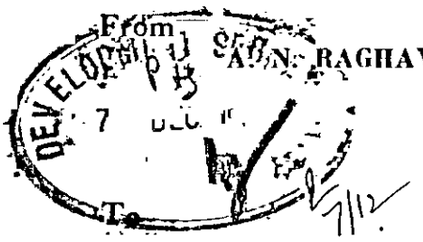
OFFICE OF THE COMPTROLLER TO THE GOVERNMENT
OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

No. 27/L.A.D. Enc one Bangalore, dated 3rd December 1934.



From
A. N. RAGHAVACHAR, Esq., M.A.,
Comptroller to the Government of
His Highness the Maharaja of Mysore,
Bangalore.

P&S 19-84-3

M. Venkatanaranappa Esq., B.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

Sir,

With reference to your letter No.G.2836/P&S 19-34-2 dated 25th September 1934 forwarding the inventories of the two Presses for 1933-34, I have the honor to submit herewith copy of this office letter No. 27/LAD dated 3rd December 1934 with which they have been returned to the Superintendent, Government Printing, Bangalore, for effecting certain corrections and improvements.

I have the honor to be,
Sir,
Your most obedient servant,

A. N. Raghavachar
Comptroller

CV 79

OFFICE OF THE COMPTROLLER TO THE GOVERNMENT
OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

No. 27 I&A.D

Bangalore, dated 3rd December *1934.*

From

A. N. RAGHAVACHAR, Esq., M.A.,
Comptroller to the Government of
His Highness the Maharaja of Mysore,
Bangalore.

To

The Superintendent,
Government Printing,
Bangalore.

Sir,

With reference to your letter P.743 dated 8th September 34 forwarding the inventories of the Central and Branch Presses for 1933-34, I have the honor to return them herewith duly checked with a statement of erroneous calculations that were traced during the course of check and to make the following observations:

(1) The internal transfers of the materials between the two Presses are not verifiable with each other. The figures shown in the column "additions made during the year" provided in each of the inventories may therefore be split up as noted below to facilitate verification;

(a) Quantity and cost of materials received from the Central/Branch Press

(b) Quantity and cost of materials obtained from remelting and casting old materials;

(c) Quantity and cost of fresh materials purchased and added during the year.

(2) If the sum total of the articles transferred internally from one Press to the other and of the cost of old types remolted to cast new ~~ruins~~ ones are deducted from the sum total of the cost of plants added during the year, the balance arrived at does not agree with the expenditure of ₹ 20,642-11-0 shown in the account of depreciation as incurred on account of the purchase of materia made and added during the year. The figures of ₹ 32,255-11-0 and ₹ 8,176-11-0 entered under "Cost of plant added during the year"

in the inventories of the two presses may therefore be analysed and the details entered in the abstracts appended to therein.

(3) A Demand, Collection and Balance Statement for the Depreciation Fund, similar to the one appended to the inventory of the Central Press, has not been made out and appended to the inventory of the Branch Press. Nor does the statement appended t the inventory of the Central Press include this depreciation fund account of the Branch Press also. The omission may kindly be examined.

(4) The form of the inventory as it is, does not take into account obsolescence of materials and machinery. There may be certain materials old and out of date, but a uniform rate of depreciation even for them is being effected from year to year. Whether this aspect does not need to be kept in view may be considered.

(5) Whether it is not desirable to round off the cost the nearest rupee and thereby save the trouble involved in calculating the depreciation to the fraction of pies, if such rounding off does not in any way materially affect the intrinsic value of the materials and machinery, may kindly be examined and stated.

The copies of the two inventories received from Government are also sent herewith for incorporation of the correction pointed out in the statement attached and for further necessary action.

I have the honor to be,
Sir,
Your most obedient servant,
Sd/- A.N.Raghavachar,
Comptroller

To

M. Venkatanaranappa Esq., B.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

Sir,

In continuation of this office letter No.271/LAD dated 3rd December 1934, I have the honor to forward herewith the two Inventories of the Central and the Branch Presses for the year 1933-34 received back from the Superintendent, Government Printing, Bangalore, with a covering Memo (copy of which is also enclosed) furnishing his replies to the points raised by this office and to observe as follows:-

First para of the Memo - If, as stated by the Superintendent, the opening of further sub columns under "Column 9 - addition during the year" in the inventory is likely to create confusion he may be directed to append the figures in the form of an abstract at the end of the inventory to bring out the information now furnished in his Memo showing the details of fresh purchases, transfers etc. The figures now furnished by him show a difference of Rs 63-1-9 for which he has been addressed.

Since furnished

Para 3 of the Memo - The depreciation account prepared hitherto is to be regarded as incomplete, because it does not take into account the similar depreciation on the machinery held by the Branch Press.

Paras 4 and 5 - For orders of Government.

I have the honor to be,
Sir,

Questions.	Replies
1. The internal transfers of the materials between the two presses are not verifiable with each other The figures shown in the column "additions made during the year" provided in each of the Inventories may therefore be split up as noted below to facilitate verification.	
(a) Quantity and cost of materials received from the Central/Branch Press.	A separate column has been provided in the Central Press Inventory for the articles issued to the Branch Press. The total figure under this column, while being a deduction in the Central Press inventory will be a receipt in the Branch Press Inventory. A similar column has also been provided in the Branch Press Inventory for the articles issued to the Central Press and the figures under this column have similar significance as above. From these two, the quantity and cost of materials received at or sent from the respective Presses can easily be made out.
(b) Quantity and cost of materials obtained from remelting and casting old materials.	Quantity and cost of types remelted have been provided in both the invoices.
(c) Quantity and cost of fresh materials purchased and added during the year.	Quantity and cost of fresh materials purchased and added during the year can be easily found out by subtracting the total cost of (a) and (b) from the "Cost of Plant added during the year as verified below:-

	Central Press.		
Additions during the year.		Rs.	32,255-11-5.
	Branch Press.		
Additions during the year.			8,176-11-10.
	Total	Rs.	40,432- 7-3
Deduct. -			
Articles issued to Branch Press.	506-5-10		
Articles sent to Central Press (Old types remelted)	292-13-3		
(Central Press).	4,930- 4-0		
do Branch Press.	2,987-12-6.		8,717- 3-7
Cost of Plant and Materials purchased and cost of types cast from fresh metal, during the year.			31,715- 3-8
Deduct cost of plant added (Purchase of machines.)			20,642-11-0
Cost of materials purchased and types cast from fresh metal.			11,072- 8-8

The cost of materials has been not fro

this type in the Press Budget. The expenditure of Rs.20,642-11-0 shown in the account of depreciation represents only the cost of machines and machine parts purchased, but does not include the cost of materials and type.
The columns of the Inventory are already elaborate and a further subdivision of the column "Additions during the year" into several sub-columns as analysed above will make the matter very much complicated and hence it is not practicable.

(2) If the sum total of the articles transferred internally from one Press to the other and of the cost of old types remelted to cast new ones are deducted from the sum total of the cost ofplants added during the year, the balance arrived at does not agree with the expenditure of Rs.20,642-11-0 shown in the account of depreciation as incurred on account of the purchase of materials made and added during the year. The figures of Rs.32,255-11-5 and Rs.8,176-11-10 entered under "Cost of plant added during the year" in the Inventories of the two presses may therefore be analysed and the details entered in the abstracts appended to therein.

Vide answer to (1)(c) supra.

(30. A Demand Collection and Balance statement for the Depreciation Fund, similar to the one appended to the Inventory of the Central Press, has not been made out and appended to the Inventory of the Central Press. Nor does the statement appended to the Inventory of the Central Press include this depreciation fund account of the Branch Press also. The omission may kindly be examined.

A depreciation account will be opened at the Branch Press from next year, so ordered.

(4) The form of the inventory as it is, does not take into account obsolescence of materials and machinery. There may be certain materials old and out of date, but a uniform rate of depreciation even for them is being effected from year to year. Whether this aspect does not need to be kept in view may be considered.

Obsolete materials or machines which are not of any use to the Press will generally be disposed of by auction after duly obtaining sanction of Government. The percentage of depreciations regularised in G.O.No.G6407-8/P&S 51-30-13 dated 11/15-2-1932 and the rates are based on those obtaining at the Govt. Press, Madras. It is not possible to fix different rates of depreciation as suggested above.

(5) Whether it is not desirable to round off the cost to the nearest rupee and thereby save the trouble involved in calculating the depreciation to the fraction of pies if such rounding off does not in any way materially affect the intrinsic value of the materials and machinery, may kindly be examined and stated.

This is a good suggestion and will be followed if approved. Much clerical labour will be saved if the cost is rounded to the nearest rupee.

24/2/35

Central Press - (Erroneous calculations).

Composing. -
Sl. No.78. 10 -pt. split fractions. The original figures noted against amount of depreciation and net value viz., Rs. 1-4-0 and Rs.9-2-6 are found to be correct and hence they are retained.
The other items have been duly corrected as per statement enclosed with Comptroller's letter No.270/LAD dated 3rd December 1934.

Branch Press.

Composing . -
Sl.No.93 - 14pt. Urdu Black. The Asst. Superintendent, Govt. Branch Press, Mysore, intimates in his letter No.1077 dated 12-1-1935 that the quantity on 1-7-1933 stood at 348 lbs. 4½ oz. and not 384 lbs. 4½ ozs. as previously noted. This has since been rectified. The quantity of depreciation works out to 41 lbs. 13 ozs. as mentioned in the Inventory which is verified to be correct. The other items have been duly corrected as per statement referred to above.

"Copy".

SIR,

In continuation of this office letter No.381/LAD. dated 12-2-35 submitting the two inventories of the two Presses for 1933-34, I have the honour to enclose copy of letter No.P.2803 dated 29-3-1935 from the Superintendent, Government Printing, explaining therein the cause for the difference of Rs.63-1-9 referred to in this office letter.

I have the honor to be,
Sir,
Your most obedient servant,

A. N. Raghavachar
Comptroller.

U.

Letter No.P.2803 dated the 29th March 1935 from the Superintendent, Government Printing, Bangalore to the Comptroller of Mysore, Bangalore.

With reference to your letter No.382/LAD. dated the 13th February 1935, pointing out that a difference of Rs.63-1-9 is noticeable in the value of the articles transferred from one Press to another and that it may be reconciled, I have the honour to state that the figures under the column 'Additions made during the year' in both the Central and Branch Press Inventories, have been analysed as noted below to facilitate verification. The sum of Rupees 63-1-9 represents certain sundry articles purchased from contingencies and not from the Head Materials and Type and this has been traced and shown below under the head 'Fresh materials purchased' in the Central Press during the year.

Central Press, Bangalore.

Additions during the year ..					Rs.	32,255	11 5
Deduct :-							
Cost of Machines		17,117	11	0			
Fresh Materials-							
Materials & Type	9,851-13-5						
Purchased from contingencies	63- 1-9						
		9,914	15	2			
Old types remelted		4,930	4	0			
Materials received from the Branch Press ...		292	13	3			
						32,255	11 5

Branch Press, Mysore.

Additions during the year ..						8,176	11 10
Deduct :-							
Cost of Machines ...		3,525	0	0			
Fresh Materials-							
Materials & Type ...		1,157	9	6			
Old types remelted ...		2,987	12	6			
Materials received from the Central Press, Bangalore		506	5	10			
						8,176	11 10
